SUMMARY

Versatile Full-Stack Developer and IT Professional with 6 years of foundational experience spanning public sector systems administration and custom web application delivery. Demonstrates a robust, practical understanding of database design, custom CRUD system building, and multi-framework integration. Currently a first-year student leveraging advanced academic training in Software Engineering and AI models at Centennial College to bridge web architectures with data-driven enterprise automation.

EDUCATION

Centennial College

2026-09-02 - 2028-04-30

Software Engineering Technology – Artificial Intelligence

Toronto, Ontario, Canada

- Coursework: Mobile UX/UI design, app integration, performance optimization, machine learning, Object-Oriented Software Design (Java), NLP workflows, Image Recognition modules, building automated Software Bots

INTI International University

2025-03-03 - 2026-10-30

Master of Science in Information Technology

Malaysia (Online Learning)

- Coursework: Advanced Enterprise Software Architecture, Business Intelligence & Data Analytics, Architecting scalable cloud infrastructure solutions, managing end-to-end software delivery workflows.

Murang'a University Of Technology

2014-09-01 - 2018-08-01

Bachelor of Science in Information Technology

Murang'a, Kenya

- GPA: 3.471
- Coursework: Systems Analysis & Architecture, Object-Oriented Programming (Java/C++), Advanced Relational Database Systems (MySQL), Discrete Mathematics and Statistical Calculus, Network Infrastructure Design, Theoretical Computer Science & Advanced Algorithmic Analysis

EXPERIENCE

County Revenue & Land Registry System Administrator

2020-10-01 - 2026-08-31

Mandera County Government

Mandera, Kenya

- Training system users
- Configuration of POS machines
- Managed, deployed, and configured handheld Android POS hardware networks and transactional revenue databases.
- Spearheaded implementation audits for the Revenue Collection Management System (RCMS), drastically reducing data discrepancies and safeguarding financial audit tracking.
- Maintained user access controls, secure schema migrations, and optimized raw MySQL data queries for regional public infrastructure routing.

Freelance / Side Projects

2019-03-01 - 2026-06-01

- Built and structured an accessible, multi-tier public portal optimized for high up-time and community information requests, utilizing Laravel and responsive Bootstrap layouts.
- Engineered a dynamic database-driven resource index website powered by Laravel and MySQL to streamline official publication access, committee reports, and tender postings.

SKILLS & INTERESTS

Technical: fullstack-AI-development, machine-learning-frameworks, backend-web-development, mobile-app-development-flutter

Languages: english, Swahil

Interests: FIFA-PlayStation-gaming, lawn-tennis, nature-and-outdoor-exploration
